THE BIRTH OF TEXT MESSAGING

Where would **we** be without text messaging? It's allowed us to be more efficient, independent and direct. Texting, or SMS (short message service) is a method of communication that sends text between cellphones — or from a PC or handheld to a cell phone. The "short" part comes from the maximum size of the text messages: 160 characters (letters, numbers or symbols in the Latin alphabet).

The SMS concept was developed in 1984 by Fried helm Hillebrand and Bernard Gillebaert.

The first text message was sent in 1992 from Neil Papworth, a former developer at Sema Group Telecoms. Mobile phones didn't have keyboards at the time, so Papworth had to type the message on a PC. Papworth's text — "Merry Christmas" — was successfully sent to Richard Jarvis at Vodafone.

01) A que se refere a sigla SMS mencionada no texto?
